WordPress production for agencies.

Bring your approved design or storyboard. We build it in WordPress, test the customer journey and hand over a site your client can edit.

The decision brief

Editable WordPress pages	You supply approved design, copy and images. We build the agreed pages and give you a working preview on phone and desktop. Each scope sets its own acceptance test and revision allowance.
One customer journey	Agree what the visitor needs to do and who handles the result. For an enquiry, we test what reaches the person who answers it. Inspect the finished work brief.
Handover to a named owner	Your client keeps the agreed accounts, files and access. We practise a routine edit with their owner and walk them through the recovery instructions.

Bring a client project.

Send the approved brief, project budget and launch date, and who will accept the build. We confirm the deliverables, timing, fixed fee and kickoff amount in writing.
